

Sewing Instructions: First time sewers, please do not attach fabric to these sheets and do not put thread in your machine. Practice each corner with your quick tip, starting with the needle down at each corner and lifting the sewing foot, turning your paper at each corner until you reach the end. Add fabric to your paper and thread your machine, back to the start line and needle down, repeat what you did at each corner until you reach the end. Remember to cut your threads long so that your machine do not come un-threaded. Have fun sewing and remember that practice does make perfect!
