

Sewing Instructions: First time sewers, please do not attach fabric to these sheets and do not put thread in your machine. Circles are not as hard as they seem, it is just a matter of following your lines and controlling your speed. You may start where you feel comfortable and remember to move your paper as you go. This does take practice but your skill will improve every time you do this sheet. Once you feel comfortable, add fabric and thread your machine, start on your circle and when you get to the place you started sew a few stitches over your beginning stitches to lock them in place. Remove and cut your threads long. Have fun sewing and remember that practice does make perfect!
