

Sewing Instructions: First time sewers, please do not attach fabric to these sheets and do not put thread in your machine. Practice only doing the colored lines first; control of your speed and do your best to make those lines straight. A quick tip - always start with your lines with the needle down into your start line; needle down at the stop line as well; this will help with the next step. Add fabric to your paper and thread your machine, back to the start line and needle down; now you will stop at each end, but you will be lifting the sewing foot, turning your paper, follow the black line to the next colored line and repeat until you reach the end. Have fun sewing and remember that practice does make perfect!
